# GRAYS – HOCKEY'S ORIGINAL BRAND.

---

**CONTINUOUS INNOVATION HAS BEEN AT THE HEART OF THE GRAYS BRAND SINCE 1855. FROM THE WORLD-FAMOUS KARACHI KING TO THE INTRODUCTION AND DEVELOPMENT OF THE VERY LATEST IN COMPOSITE TECHNOLOGY; GRAYS HAS ALWAYS LED THE FIELD.**

Grays latest Kinetic and Graphene models were put to good use at the Olympics where more Gold Medals were won in Rio by Grays ambassadors than any other hockey brand, underlining Grays as truly the International's choice.

The new range features three technologies in sticks that differentiate Grays from the competition and provide a spectrum of playing characteristics for all skill levels and positions. In addition new shinguards, gloves and balls make up a progressive and technically adept range from the leading worldwide specialist hockey manufacturer.

The success of Argentina and Great Britain marks a new chapter for hockey. Its legacy will be sure to bring exciting new growth opportunities across a wide range of new hockey communities. Grays will be there every step of the way - assisting the hockey family to achieve their ambitions and goals.

# STICK TECHNOLOGY SHAPES

## LATEST HOCKEY STICK TECHNOLOGY WITHIN YOUR REACH

For 2017 we are proud to launch the most technically-focussed Grays range to date; featuring three levels of composite technology to suit all players and techniques. The GX range remains a core foundation, while we have expanded the GR range in response to exceptional player feedback. After an extensive test period in both the lab and on pitch, we are also excited to announce a full KN lineup, which delivers unbelievable pickup and agility without sacrificing power or stability.

Our extensive shape collection is highlighted by the new Probow Xtreme, which is our most extreme profile to date. With a hugely exaggerated Probow shape, enhanced dragflick groove, and unique toe profiling, this stick is fully engineered for dynamic 3D play.

The Grays research programme continues to push technology limits within the lab, with all concepts simultaneously tested on the field. With our unrivalled player profile we are proud to offer products and technologies which truly respond to the needs of top internationals and club players alike.

### PROBOW XTREME

The Probow Xtreme is an evolution of the Probow shape, with the sole purpose of pushing the limits of 3D play. The playing face has been completely re-engineered to increase the dragflick zone, and the flat backhand edge has been increased to generate extra strike power. Combined with unique toe design for close skills, and embossed Power Groove on the reverse of the stick, make this an exceptional stick for dynamic modern play.

#### Suitable for:

- Drag flicking, dynamic 3D skills and aerals
- Combinations of technical play, hitting and flicking

**Blade Profile:** 24.75mm

**Curve Location:** 200mm

### PROBOW

The Probow profile is defined by a straight profile which transitions into an extremely low bow, making it perfect for 3D skills and drag flicking. A unique Dragflick Groove on the face helps control the ball, while the square-profile edge increases the sweet spot for backhand shots. The thin profile of the stick is ideal for flicking and pushing, and is combined with an aggressively sculpted heel which helps get underneath the ball for aerals and 3D play.

#### Suitable for:

- Drag flicking, dynamic 3D skills and aerals
- Combinations of technical play, backhands, and flicking

**Blade Profile:** 24.75mm

**Curve Location:** 200mm

### JUMBOW

The Jumbow profile combines the low curve location of the Probow, with the sweeping curve of the Dynabow. This makes it a dynamic sticks for all styles of play; with the ability to perform 3D skills and the power for traditional striking shots. The thick profile and heel are well suited to striking and tackling, while the hook option offers extra stopping area.

#### Suitable for:

- Combinations of technical play, backhands, and hitting
- Drag flicking, aerals

**Blade Profile:** 24.75mm

**Curve Location:** 200mm

### DYNABOW

The Dynabow profile offers a refined, sweeping curve along the length of the stick, while maintaining a maximum height allowed under FIH regulations. Combined with a slim headshape and round lower-hand profile makes these sticks excellent for all-round play and nimble 3D skills.

#### Suitable for:

- Combinations of technical play, hitting, and dribbling
- Dynamic 3D skills and aerals

**Blade Profile:** 24.75mm

**Curve Location:** 250mm

### MIDBOW

The Midbow profile maintains a high curve location, giving it a classic curve while still conforming to FIH regulations. The face of this shape is extremely flat, with a unique cross-section profile to generate extra stiffness. The rear profile also incorporates embossed Power Grooves to create extra torsional stability and stiffness.

#### Suitable for:

- Combinations of technical play, and aerals
- Slap hitting, sweeping, and flat techniques

**Blade Profile:** 24.75mm

**Curve Location:** 300mm

### ULTRABOW

The Ultrabow profile is the least extreme model, which features a classic profile and gentle sweeping curve. The micro headshape and thin toe make this shape ideal for general play and simple 3D skills.

#### Suitable for:

- Combinations of general play and simple 3D skills
- Controlled passing, receiving, and shooting

**Blade Profile:** 22.00mm

**Curve Location:** 300mm

# FEATURES

## Heel Protection

There are several levels of technology to help guard sticks from the abrasive wear of playing on synthetic pitches.

### DHP Durazone Heel Protection

An advanced formulation of abrasion-resistant materials which dramatically reduces heel wear

### CHP Carbon Heel Protection

Mid-level heel protection featuring carbon and aramid.

### IHP Integrated Heel Protection

A specific combination of high-strength fibreglass and impact-resistant resin.

## Playing Face

The playing face dramatically affects the characterises of each stick, especially when receiving the ball and in one-touch skills.

### PFA Pro Feel Area

Combined with aramid, the vibration-dampening foam used in Geocentric Core technology softens the first touch, while the external playing surface is both textured and coated in a high-grip silicone.

### IFA Carbon Heel Protection

A special combination of shock-absorbing aramid and fibreglass softens the first touch of the ball, while a textured surface helps grip the ball.

### TFA True Feel Area

A specifically formulated composition of fibreglass in the playing face gives the true feeling of how the stick is playing.

## Backhand Zone

The backhand zone of sticks is particularly at risk from damage, due to the small surface area which bears the force of each strike.

### PEP Pro Edge Protection

An advanced formulation of impact-resistant materials and resin formulation, to help improve the longevity of the backhand edge..

### CEP Carbon Edge Protection

Mid-level edge protection featuring carbon and aramid.

### IEP Integrated Edge Protection

A specific combination of high-strength fibreglass and impact-resistant resin.

## Handles

Sticks in the collection feature different levels of handle technology, to reduce the impact energy transferred from striking the ball..

### PFH Pro Edge Protection

An lightweight, high performance foam surrounds the handle to efficiently dissipate shockwaves.

### ERH Energy Reduction Handle

A moulded rubber sleeve reduces the vibrational energy

### TFH True Feel Handle

A specific combination of high-strength fibreglass and impact-resistant resin.

## Carbon Technology

Sticks in the Grays collection are carefully engineered to have optimal levels of reinforcement. Carbon enhances the stiffness and power of each stick, and is available in several technologies

### TRITEC Top Level Technology

Grays' unique carbon reinforcement provides multi-angular reinforcement, giving unrivalled structural stability to the stick, and maximum power transfer when hitting.

### TWILL UD High Level Reinforcement

Twill carbon with additional carbon Torque Bars provides extra stability against twisting forces, and increases the strike zone of the stick.

### TWILL Mid Level Reinforcement

High-modulus carbon is woven to create an interlinking structure, which reinforces the structural integrity of the stick, and increases power transfer.

## Headshapes

To suit all styles of play, the collection features three angles of headshape, which complement the shape profile of each stick.

### MAXI 45° Angle

- Traditional shape for hitting
- As used by Ashley Jackson

### MICRO 50° Angle

- Modern shape for dynamic play

### HOOK 75° Angle

- Greater surface area for stopping
- As used by Robert van der Horst

## KINETIC RANGE – A REVOLUTION IN STICK DESIGN.

Sticks in the KN range feature Geocentric Core Technology at the epicentre of each stick, which allows a complete redistribution of weight, creating a light and nimble pickup. This technology is designed primarily for progressive and fast-paced 3D styles of play. Tri-Tec weave and Graphene reinforcement ensures there is maximum accuracy when shooting.

Sticks in the KN range offer the maximum combination of weight, feel, and power.

**KN KINETIC**

## KN AJ7

### Jumbow-S

Engineered specifically to Ashley Jackson's preferred feel and shape.

#### Features:

- High power and feel ratings for the ultimate in performance.
- Geocentric Core Technology with Tri-Tec carbon weave and Graphene reinforcement.
- Modified Jumbow shape with thicker shaft.

**Colour Options:** Grey / Black

**Headshape:** Maxi

**Lengths:** 36.5, 37.5, 38.5

# Grays

**GR GRAPHENE**  
Maximum power & performance

## THE GRAPHENE RANGE – FOR MAXIMUM POWER & PERFORMANCE.

Graphene is exceptionally strong and light, and has been precisely combined with the highly successful GX composition to forge the GR technology. By combining graphene into the composite matrix, players will have all the durability and playability of GX technology, and with extra power and feel from graphene.

Sticks in the GR range offer exceptional feel, power, and playability.

## STICK CHARACTERISTICS

All Grays sticks are manufactured to the highest specifications. Every material we use has a specific characteristic. Carbon content prevents stick flex, whilst fibreglass creates an improved feel. All other materials improve both the durability and performance of the product.

### CAGE AST.

The CAGE All Surface Traction Shoe is the most innovative shoe ever to be launched into the hockey market place. Designed for Elite players looking for outstanding performance the CAGE AST is packed full of unique features to improve your game.

#### Upper

- CAGE Technology – An exoskeleton cage system is soft and flexible with outstanding retention properties.
- CAGE Injection System is the next generation in upper technology –
- Sonic Fit Collar System – Provides an internal support and cushioning system and reduces the amount of water, which, can penetrate into the shoe on water based surfaces.

#### AST (All Surface Traction) Sole Unit

- Features new innovative durable, flexible outsole designed to offer outstanding traction and grip especially on water based surfaces.
- Rigid TPU cleats provide outstanding purchase on the synthetic surface allowing for quicker tighter turns.
- Hollowed out cleats reduce the weight of the sole plate but absorb the harsh impact from the synthetic surfaces.
- Gel Zone PP - Attenuates shock during impact phases, and allows movement in multiple planes as the foot transitions through the gait cycle.

- Torsion stability – Micro-light Carbon E.P.S. Carbon Technical stabilisation unit integrated into the EVA midsole to maintain torsional stability of the shoe
- GPRO EVA 80 – Utilising 80 Degree GPOR EVA midsole material provides a more stable but extremely cushioned platform feel.

#### Internal

- The compression set of Haipoli footbed is less than 5% over time so the cushioning and fit never change inside the shoe – providing maximum comfort every time
- S.H.F – Superior heel fit – Built in TPU counter provides stability and a secure fit reducing lateral movement in the heel area, combined with ultra soft memory foam for a unique fit.
- Low profile dynamic last.

**Colour Options:** Black/Orange  
**Size Options:** 4, 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12, 13

# MENS FOOTWEAR

## GX12000

Designed for speed - this low profile, lightweight shoe is designed specifically to meet the needs of quick and agile players looking for extreme responsiveness from their footwear.

### Upper

- G-Cage XP2 - High performance welded G-CAGE system - durable compound PU welded to the mesh provides protection and stability, yet is ultra-lightweight and flexible.
- Toe Guard - Gtuff Plus - Toe protection welded into upper

### GTech II Pro Sole

- Outsole - GTech II Pro Sole is full rubber with multi directional-cleated grip pattern. Suitable for sand and water based pitches.
- Revolutionary outsole technology reduces weight by 42% from previous shoes, combined with the flex-free technology designed for explosive movement and key side wraps for a stable hitting platform.
- Midsole EVA - GPRO PU80 - Utilising 80 degree GPRO PU midsole material in the lower part of the sole provides a more stable platform feel.

### GPRO EVA 50 Lite

replaces traditional foam midsole material with softer, structured elements that react to impact and then return back to launch you into your next step.

### Internal

- The compression set of Haipoli footbed is less than 5% over time so the cushioning and fit never change inside the shoe - providing maximum comfort every time
- S.H.F - Superior heel fit - Built in TPU counter provides stability and a secure fit reducing lateral movement in the heel area, combined with ultra soft memory foam for a unique fit.

**Colour Options:** Black/Orange  
**Size Options:** 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12, 13

## GX8500

Designed and developed for fast movements on the hockey field. Ideal for quick and agile players, it has a low profile combined with a stable platform for better ball striking.

### Upper

- G-WP Microfibre - Water repellent upper material features an abrasion and tear resistant synthetic material which increases upper durability.
- Toe guard - Gtuff Plus - Toe protection welded into upper.

### GTech II Pro Sole

- Outsole - GTech II Pro Sole is full rubber with multi directional-cleated grip pattern. Suitable for sand and water based pitches.
- Revolutionary outsole technology reduces weight by 42% from previous shoes, combined with the flex-free technology designed for explosive movement and key side wraps for a stable hitting platform.
- Midsole EVA - GPRO PU80 - Utilising 80 degree GPRO PU midsole material in the lower part of the sole provides a more stable platform feel.

### GPRO EVA 50 Lite

- replaces traditional foam midsole material with softer, structured elements that react to impact and then return back to launch you into your next step.

### Internal

- The compression set of Haipoli footbed is less than 5% over time so the cushioning and fit never change inside the shoe – providing maximum comfort every time
- S.H.F – Superior heel fit – Built in TPU counter provides stability and a secure fit reducing lateral movement in the heel area, combined with ultra soft memory foam for a unique fit.
- I.P.S (Impact Protection System).

**Colour Options:** Blue/Green  
**Size Options:** 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12, 13

### GX5500

A lightweight performance hockey shoe - with low profile technology for fast moving players.

#### Upper

- G-WP PU - High grade PU upper with water repellant coating and high abrasion properties for a durable upper.
- Toe guard - GTuff - strategic toe protection to prevent wear during play.

#### TRIO SYSTEM LOW PROFILE OUTSOLE

- Low profile - Ensures optimal traction on the field,
- Made of Thermo Fused rubber. The studs are strategically positioned for better traction while turning.
- Midsole EVA - GPRO EVA - Utilising 80 degree GPRO EVA midsole material in the lower part of the sole provides a more stable platform feel.

#### Internal

- Sockliner - can be removed to accommodate a medical orthotic.
- Heel - S. H. F (Superior Heel Fit) - External TPU heel counter provides stability and a secure fit and reduces lateral movement in the heel area. Combined with ultra soft memory foam for a unique fit for each individual.
- I.P. S (Impact Protection System).

**Colour Options:** Black/Fluo Yellow

## FLASH

Designed for fast moving players looking for a low profile shoe with an ultra grippy outsole for high performance on all surfaces especially sand based pitches.

### Upper

- Lightweight breathable PU upper which provides a comfortable & breathable upper.
- Lateral support cradle – redesigned logo element provides stability for quick changes of direction.
- Reinforced dura-tech toe box.

### G-PLUS LP Sole

- New high performance rubber outsole for ultimate traction and grip on synthetic sand based surfaces.
- Cleat pattern designed to improve the efficiency of movements in hockey – larger perimeter studs provide better traction when turning.
- Improved Xtra-Dura+ compound provides the perfect balance between the grip required between the sole and

the synthetic surface and the responsiveness for quick multi directional movements.

- The improved midsole contains strategic flex grooves aligned with the outsole to promote quick sharp movements.

### Internal

- Footbed - can be removed to accommodate a medical orthotic.
- Heel - S. H. F (Superior Heel Fit) - External TPU heel counter provides stability and a secure fit and reduces lateral movement in the heel area. Combined with ultra soft memory foam for a unique fit for each individual.
- I.P. S (Impact Protection System).

## CAGE AST.

The CAGE All Surface Traction Shoe is the most innovative shoe ever to be launched into the hockey market place. Designed for Elite players looking for outstanding performance the CAGE AST is packed full of unique features to improve your game.

### Upper

- CAGE Technology – An exoskeleton cage system is soft and flexible yet provides outstanding retention properties.
- CAGE Injection System is the next generation in upper technology – the dual layer system is water repellent.
- Sonic Fit Collar System – Provides an internal support and cushioning system, which reduces the movement inside the shoe when changing direction & provides additional comfort and support.
- Sonic fit collar also reduces the amount of water which, can penetrate into the shoe on water based surfaces.

### ST (All Surface Traction) Sole Unit

- Features new innovative durable, flexible outsole designed to offer outstanding traction and grip especially on water based surfaces.
- Rigid TPU cleats provide outstanding purchase on the synthetic surface allowing for quicker tighter turns.
- Hollowed out cleats reduce the weight of the sole plate but absorb the harsh impact from the synthetic surfaces.
- Gel Zone PP - Attenuates shock during impact phases,

and allows movement in multiple planes as the foot transitions through the gait cycle.

- Torsion stability – Micro-light Carbon E.P.S. Carbon Technical stabilisation unit integrated into the EVA midsole to maintain torsional stability of the shoe
- GPRO EVA 80 – Utilising 80 Degree GPOR EVA midsole material provides a more stable but extremely cushioned platform feel.

### Internal

- Removable Footbed, which can be removed to accommodate a medical orthotic.
- Unlike traditional footbeds the compression set of Haipoli insoles is less than 5% over time so the cushioning and fit never change inside the shoe – providing maximum comfort every time
- S.H.F – Superior heel fit – Built in TPU counter provides stability and a secure fit reducing lateral movement in the heel area, combined with ultra soft memory foam for a unique fit.
- Low profile dynamic last

Wales **900204**

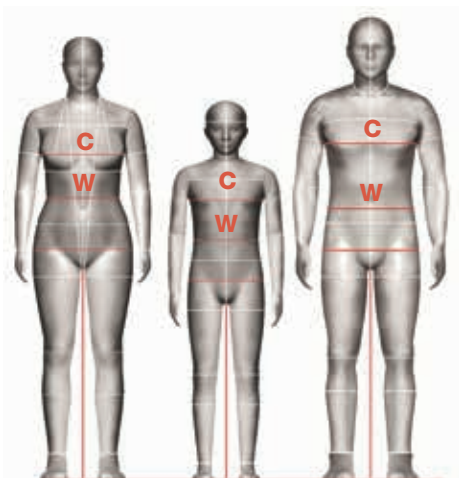

## KEYRING INTERNATIONAL

### Features:

- Composite Keyring
- Countries:** England, GB, Holland, Ireland, Scotland, Wales

# HOCKEY SIZING

## MEASURING

### CHEST CIRCUMFERENCE (C)

Measure all the way around - taking the tape approximately 2.5 cm from pit of arm, around the fullest part of the chest. Try to keep the tape level.

### WAIST CIRCUMFERENCE (W)

Measure all the way around - taking the tape around the natural waist - (this is the narrowest part of your waist). Try to keep your tape measure level. Our trousers and shorts are elasticated so there always plenty of room for movement here - if you are confused - Use the hip measurement.

## GENERAL TIPS:

1. Measure yourself wearing underwear - do not measure over clothing.
2. Stand straight and keep both feet on the floor.
3. Make sure the tape measure is kept level.
4. Ask a friend to help take your measurements - (it's sometimes easier to have help).

Our ranges are designed with layering in mind. If you buy a jacket for your body size, you can be sure you will be able to fit a top and a light sweater underneath.

**\*\*All measurements are an approximate guide.**

Finding the perfect size isn't always easy. The fit of your clothes depends on many things, including the cut, fabric, styling and even the undergarments you are wearing! By following our body guide and how to measure guide, we hope to find you the best possible fit. It is always suggested that you measure more than once as your posture changes when you move and sometimes effects the measurement you take.
